

REACH

PRIMEX Plastics Limited is well aware of the new REACH legislation and is working closely with all its suppliers to ensure that all the raw materials used are compliant, or have been registered, with REACH.

PRIMEX is classed as a downstream user under REACH and therefore, the onus is on our raw material suppliers to confirm to us that their materials have been pre-registered, registered or are REACH compliant. Many of the substances we use are already REACH compliant however, there are still a number of substances that need to be registered.

We have confirmation from our suppliers that all of the substances requiring pre-registration have, or will be, pre-registered before the deadline of December 2008.

Deadlines for full registration of substances, depending on volume, are 2010, 2013 and 2018.

If you need any further information regarding REACH, please contact your usual PRIMEX representative on the numbers below.
